

MATLAB for students at CU-Boulder

If you haven't already done so, create a MathWorks account online using your "@colorado.edu" email address and the CU student license number 988884.

From that online account you can download, install, and activate the MATLAB software on your personal computer.

STEP 1: LOG IN TO YOUR MATHWORKS ACCOUNT

- Go to the MathWorks license center, <https://www.mathworks.com/accesslogin/login.do>
 - Log in.
 - If you don't already have such an account, click on "Create an account".
Create your MathWorks account using your @colorado.edu email address.

STEP 2: LICENSE

- On the License Center website <https://www.mathworks.com/licensecenter> click on "Add License" (upper right corner of page).
- Choose "Associate by Activation Key" and click Continue.
- When prompted, enter the Activation Key **19427-60532-36036-83314-92087**

STEP 3: DOWNLOAD and INSTALL

- Go to the download site http://mathworks.com/downloads/web_downloads/select_release
- Click the download button for the current release.
- Click the installer button to download the installer. Note the browser's download location.
- On your computer, find the installer that your browser downloaded (on Macs file "matlab_2014b_maci64.zip", and in Windows, "matlab_2014b_win64.exe"), and double-click on it:
 - In Windows, a self-extractor runs, and then the installer starts
 - In Mac OS X, a folder is extracted from the Zip file; in it, double-click **InstallForMacOSX** to start the installer
- In the MathWorks installer, select **Log in with a MathWorks Account** and follow the online instructions.
- When prompted to do so, select the license you want to use. Select the products you want to download and install.
- After downloading and installing your products, keep the **Activate MATLAB** checkbox selected and click **Next**. When asked to provide a user name, verify that the displayed user name is correct. Continue with the process until activation is complete.

The MATLAB license will be good through November 30.
